Project Design Phase – 1

Date	28 September2022
Team ID	PNT2022TMID05100
Project Name	AI Based Discourse for Banking industry
Maximum Marks	4 marks

Solution Architecture:

Solution architecture is a complex process – with many sub ppprocesses – that bridges the gap between business problems and the technical solutions. Its goals are to:

- It acts as the base of the solution to define, deliver, manage and operate the development process of the solution.
- It identifies the alternatives of the solutions and its components. It is a basic architecture of the offered solution.
- This part of the document states the business goals and the solutions goals.
- It is a description of a discrete and focused business operation or activity and how it supports that operation.
